Adrenal

The adrenal cortex helps to maintain the water and sodium homeostasis (balance) within the body; it also contributes to carbohydrate metabolism and the regulation of blood sugar. The adrenal cortex further produces a sex hormone similar to that secreted by the testes. The medulla of the adrenal gland produces the hormone epinephrine, also called adrenaline, when the body is under stress; this hormone speeds up the rate of metabolism in order to help it cope with stressful situations. The performance of the adrenal glands is most often impaired due to extensive use of cortisone therapy for nonendocrine diseases, such as arthritis and asthma. Long-term use of cortisone drugs also causes the adrenal gland to shrink in size. Pituitary disease and tuberculosis also lead to adrenocortical failure.

New Roots Herbal's Adrenal concentrate nourishes the adrenal gland with nutrients which help it cope with the challenges of our modern high-stress environment.

New Roots Herbal's Adrenal concentrate is made from toxin-free lyophilized glands. The term "lyophilized" refers to a freeze-drying process in the raw state, which provides the highest level of biological activity.

Each vegetable contains:

Adrenal concentrate (3:1) (from *Sus scrofa*) 200 mg
Vitamin C 6 mg

Other ingredients: Peppermint leaves, vegetable magnesium stearate, silicon dioxide, and microcrystalline cellulose in a non-GMO vegetable capsule composed of vegetable carbohydrate gum and purified water.

NPN 80056719 · V0365-R9

Suggested use:

Adults: Take 1 capsule daily or as directed by your health-care practitioner. If you are taking other medications, take this product a few hours before or after them. Consult a health-care practitioner for prolonged use.

Manufactured under strict GMP (Good Manufacturing Practices).
