Beef Bone Broth Protein

New Roots Herbal's **Beef Bone Broth Protein** powder boasts a naturally occurring protein content of more than 90%. It's a highly bioavailable bovine source of healthy protein that delivers the essential amino acids your body craves, in proportions that fuel your metabolism and the cell-renewal process critical for maintaining strength and vitality.

Minimally processed by means of slow simmering maximizes the release of the proteins, minerals, and vitamins that serve to benefit every aspect of your health. Raised without antibiotics and bovine growth hormones, its New Zealand origin also guarantees freedom from bovine spongiform encephalopathy (BSE), known as "mad cow disease."

It dissolves rapidly in hot water to quench your body with nutrients it craves, which include collagen.

The preservation of strength and lean muscle mass has emerged as a critical component for healthy aging; with approximately seven grams of protein per tablespoon, **Beef Bone Broth Protein** makes an excellent source of protein to support a healthy, active lifestyle. Supplementation following both aerobic and strength training is a great way to fuel the process of muscle repair and growth.

At seven grams of protein per tablespoon, **Beef Bone Broth Protein** is a great way to pump up the protein quotient of smoothies, soups, sauces, or virtually any other culinary creation. If you find yourself drinking too much coffee, try swapping your afternoon cup of brew for the soothing and savoury flavour of a piping-hot cup of beef broth.
