# BlackWalnut Green Hulls

New Roots Herbal's **BlackWalnut Green Hulls** are selectively and ecologically wild-harvested from the tree while they are green. They are freeze-dried to retain enzyme purity, and are much stronger and more effective than a tincture extract. Another benefit is that the capsules are free of alcohol.

The green hulls are the most sought-after for their medicinal and astringent qualities. Having a high elemental iron content, black walnut (*Juglans nigra*) is a powerful astringent and antifungal herb that may be used for expelling worms, parasites, *Candida*, canker sores, cold sores, fungus, tuberculosis, herpes, and eczema, and has a mild laxative effect.

**BlackWalnut Green Hulls** also remove parasites from extracellular fluids, such as the blood and lymph, and in organs such as the liver, kidneys, brain, and heart. Black walnut contains flavonoids; tannins; ellagic, tannic, and gallic acids; juglone; nucin; trace minerals; and vitamins.

The dried green hulls of this plant are considered to be alternative, tending to restore normal health. They are well-known as astringent restoratives. Worldwide, parasites outrank cancer as humanity's greatest enemy to health.

Black walnut cleanses and purifies the blood. It is very effective in the treatment of intestinal parasites, fighting them and expelling them from the organism. It has a laxative action as part of the detoxification and decongestion action on the organism, affecting the whole system.

It is very beneficial in a variety of skin disorders. It has a great amount of minerals, trace elements, and amino acids. It should be used for bone disorders and mineral deficiency.

#### Each vegetable capsule contains:

Black walnut (*Juglans nigra*) green hulls ..... 150 mg

**Other ingredient:** Fresh peppermint leaf and vegetable magnesium stearate in a non-GMO vegetable capsule composed of vegetable carbohydrate gum and purified water.

NPN 80044379 · V0289-R2
