Cranberry

Cranberry treats urinary tract infections by taking advantage of the cranberry's legendary antibacterial properties. The special proanthocyanidin extract we have created delivers the benefits of 64,200 mg of fresh, whole, ripe cranberries in every capsule. As a result, you can trust Cranberry 107× to be fast-acting, with consistent results every time.

A Natural Remedy

Modern medical research has revealed the chemical and physiological effects cranberries have on the urinary tract and how supplementing cranberry concentrates can help prevent urinary tract infections.

Our cranberry concentrate offers the most potent, specially structured proanthocyanidins available.

Why Cranberry Works

Cranberries contain specially structured proanthocyanidins (PACs) that inhibit the adhesion of bacteria to the urinary tract and bladder, thereby preventing them from reproducing. Because of this, PACs are pivotal in the prevention of urinary tract infections.

There's More to Cranberry

While cranberries are best known for their effect on urinary tract health, recent research indicates that they may also act against bacteria elsewhere in the body. The presence of cranberry has been shown to inhibit the adhesion and subsequent infection from many types of bacteria, including those that cause stomach ulcers and periodontal gum disease.

Each vegetable capsule contains:

Cranberry (*Vaccinium macrocarpon*) fruit 107× concentrate 600 mg
Other ingredients: Non-GMO vegetable capsule made of vegetable carbohydrate gum and purified water.

NPN 80021849 · V0298-R2

Directions of use:

Adults: Take 2 capsules daily or as directed by your health-care practitioner. **For the prevention of recurrent UTIs:** Use for a minimum of 4 weeks to see beneficial effects.

Manufactured under strict GMP (Good Manufacturing Practices).
