D-Mannose&Cranberry
With Probiotics

D-Mannose&Cranberry **With Probiotics**, in a convenient powder form, is a side effect–free natural alternative to antibiotics for the treatment of recurring urinary tract infections (UTIs). Antibiotic therapy for UTIs can disrupt the natural balance of beneficial bacteria and contribute to the development of menacing antibiotic-resistant bacterial strains.

D-Mannose&Cranberry **With Probiotics** is formulated with therapeutic proportions of three proven natural ingredients: D-mannose, super cranberry 107× concentrate, and *Lactobacillus rhamnosus.* D-Mannose is a simple, naturally-occurring sugar that is not converted to glycogen by the liver. D-Mannose enters the blood stream directly; as the kidneys filter the blood, harmful *Escherichia coli* attaches to D-mannose and is harmlessly excreted. Our proanthocyanidin-rich super cranberry 107× fights *E. coli* infection by preventing its adherence within the entire urinary tract. Approximately 80% of UTIs are caused by *E. coli.*

D-Mannose&Cranberry **With Probiotics** also contains *Lactobacillus rhamnosus,* a specialized probiotic recognized for its effectiveness with antibiotic-resistant bacterial strains. *L. rhamnosus* is extremely resistant to stomach acids, and produces compounds (surfactants) that disrupt *E. coli* from causing infection within the entire urinary tract.

D-Mannose&Cranberry **With Probiotics** contains natural, complementary ingredients for relief from recurring urinary tract infections.

Every 3 teaspoon contains:

D-Mannose	4800 mg
Cranberry 107× (*Vaccinium macrocarpon*)	600 mg
Lactobacillus rhamnosus R0011	500 million CFU

NPN 80038358 · PM0574-R1

Suggested use:
Adults: Mix 3 teaspoons in water or diluted juice twice daily for two days, then 3 teaspoons in water or diluted juice once daily, or as directed by your health-care practitioner.

Manufactured under strict GMP (Good Manufacturing Practices).
