HumanProbiotics

HumanProbiotics is formulated with 12 therapeutic probiotic strains of human origin. What this means for you is the entire roster of probiotics in our formula has been validated to colonize the intestines.

Seven *Lactobacillus* species in our formula drive the digestive process, with a focus on nutrient breakdown and assimilation. Eating the right foods is important; however, having adequate numbers and diversity of probiotic species ensures many health benefits. *Lactobacillus* species release and intensify functional ingredients and vitamins in foods, in addition to synthesizing their own K and B-complex group of vitamins. They also, as their name implies, breakdown lactose found in milk, which is present in many foods and can span problems from a slight nuisance to a major food intolerance.

Five *Bifidobacterium* strains in **HumanProbiotics** are dominant species within the large intestine (colon) of healthy individuals. They're among the pioneer probiotics we're exposed to as early as birth, and which embed within the mucosal lining of the colon to establish a strong immune system. Shoring up their numbers improves disease resistance on a larger scale and for better resilience to common cold and flu viruses.

Transient probiotics of both dairy and plant origin serve many therapeutic niches; however, **HumanProbiotics** serves to populate the entire intestinal tract, with a foundation of beneficial probiotics to build upon for your health and vitality.

HumanProbiotics is potency-validated to contain 42 billion CFUs per enteric-coated capsule. It's excellent for the reestablishment of healthy intestinal flora following sickness or antibiotic use, and for long-term wellness management.

Each vegetable capsule contains:

Human Strains:

<i>Lactobacillus casei</i> HA-108.....	20.94 billion CFU
<i>Lactobacillus paracasei</i> HA-274.....	16.80 billion CFU
<i>Lactobacillus rhamnosus</i> HA-111.....	3.36 billion CFU
<i>Lactobacillus reuteri</i> HA-188.....	0.252 billion CFU
<i>Bifidobacterium longum</i> ssp. <i>infantis</i> HA-116.....	0.202 billion CFU
<i>Lactobacillus rhamnosus</i> HA-114.....	0.202 billion CFU
<i>Lactobacillus salivarius</i> HA-118.....	0.042 billion CFU
<i>Lactobacillus acidophilus</i> HA-122.....	0.042 billion CFU
<i>Bifidobacterium bifidum</i> HA-132.....	0.042 billion CFU
<i>Bifidobacterium breve</i> HA-129.....	0.042 billion CFU
<i>Bifidobacterium longum</i> ssp. <i>infantis</i> R0033.....	0.042 billion CFU
<i>Bifidobacterium longum</i> ssp. <i>longum</i> HA-135.....	0.042 billion CFU

Also contains: Vegetable magnesium stearate, non-GMO potato starch, vitamin C (ascorbic acid), inulin, and arabinogalactan in a non-GMO vegetable capsule composed of vegetable carbohydrate gum, purified water, and a water-based enteric coating.
