Pau D'ArcoTaheebo

Pau d'arco is a herb known by many names. The reason for this is simple: it was a deeply prized herb known by many of the indigenous tribes of South America. They were well aware of pau d'arco's numerous health benefits and used it for just about every health problem. The same can still be said today.

Pau d'Arco's Incredible Properties

This amazing herb has been found to have antibacterial, antiviral, antiparasitic and antifungal properties, including anti-*Candida*, anticancerous and antitumour properties. Perhaps, pau d'arco's most impressive use may be its reputation for fighting cancer. Since 1960, medical doctors in South America, at the Santo Andre hospital, have used pau d'arco to treat terminally ill cancer patients. Well known herbalists report that pau d'arco cures leukemia and reduces pain in cancer patients. It also increases blood cell counts, enabling it to fight many illnesses.

Herb Against Disease

Pau d'arco uses are many. It is also used to treat ulcers, diabetes, rheumatism, ring worm, bronchitis and other respiratory problems, gonorrhea, hemorrhages, cystitis, colitis, gastritis, Parkinson's, arteriosclerosis, Hodgkin's, lupus, polyps, prostatitis, leucorrhea, Candida, endometriosis, fibroids, cysts, growths and tumours, anemia and inflammation of the urinary tract, just to mention some of this incredible herb's uses.

Its anticancerous properties were first attributed to a phytochemical found in the bark and wood called lapachol. In a 1968 study, lapachol demonstrated highly significant activity against cancerous tumours in rats. Another research group developed a lapachol analog in 1975 which was effective in increasing the life span by over 80% in mice inoculated with leukemic cells. In a small study in 1980 with nine patients with various cancers (liver, kidney, breast, prostate and cervix), pure lapachol demonstrated an ability to shrink tumours and achieved complete remissions in three of the patients.

Pau d'arco is known to eliminate toxins in the body and purify the blood. In an original weight loss research study, performed in Chicago in 1992, women's chronic yeast infections cleared up promptly when pau d'arco was added to the formula. Pau d'arco also has anti-inflammatory characteristics, making it useful in the treatment of arthritis and other inflammatory diseases.

The safest and best part of the herb to use is the whole inner bark, brewed as a tea. New Roots Herbal's Pau d'arco uses 100% pau d'arco from the inner bark.

Each bag contains:

454 g of pau d'arco taheebo (*Tabebuia heptaphylla*) (inner bark), harvested in an ecologically friendly manner, only in a high-altitude mountain region. 100% wild-crafted.

Bags: NPN 80050986 · P0169

Each sachet contains:

Lapacho (*Tabebuia heptaphylla*) bark 2.2 g

Sachets: NPN 80044285 · V0105-R1

Each ½ teaspoon contains a crude quantity equivalent of:

Lapacho (*Tabebuia heptaphylla*) bark 900 mg

Other ingredient: Purified water, glycerin, and ethanol (25%).

Liquid: NPN 80044382 · LM0001-R2

Each vegetable capsule contains:

Lapacho (*Tabebuia heptaphylla*) bark 500 mg

Other ingredients: Vegetable magnesium stearate in a non-GMO vegetable capsule composed of vegetable carbohydrate gum and purified water.

Capsules: NPN 80043836 · V0044-R2

Suggested use:

Bags: Adults: Add 3–4 teaspoons of powder to 600 ml of water. Boil for five minutes, then let simmer for 20 minutes. Thereafter, drink as a tea. Use purified water only. Take 2–3 times a day or as directed by your health-care practitioner.

Sachets: Adults: Boil 5 sachets for 3 minutes in 600 ml of fresh water and let simmer for 15 minutes. Strain before drinking and take 1 cup two or three times daily or until preparation is finished.

Liquid: Shake well. Adults: Take ½ teaspoon twice daily or as directed by your health-care practitioner.

Capsules: Adults: Take 2 capsules three times daily or as directed by your health-care practitioner.

Manufactured under strict GMP (Good Manufacturing Practices).
