PurgeParasitis Program

PurgeParasitis Program is a 33-day plan that helps eliminate harmful parasites from your body. Unlike rough chemicals that do as much harm to your body as they do to the parasites, the products in **PurgeParasitis Program** are all-natural.

The Risk of Parasites

People with a weak immune system are particularly vulnerable to parasites. The risk of having parasites can be increased through foreign travel, daycare centers, contaminated water, pets, exotic food, and undercooked meat and fish, as well as through improperly washed meat, fruits, vegetables, and grain. Overuse of antibiotics and immunosuppressive drugs, nonprotected sex, and contact with toxins and chemical pollutants can also pave the road to parasites.

Parasite warning signs include constipation, diarrhea, gas and bloating, skin problems, allergies, insomnia, sore joints and muscles, chronic fatigue, and immune-system problems.

PurgeParasitis Program for Safe Parasite Elimination

Our twelve traditional antiparasitic herbs—including garlic, cloves, grapefruit seed extract, and wormwood, to name a few—are powerful ingredients that can rid you of parasites you may have.

Get With the Program

How long should you follow an herbal antiparasite program? Most people see positive results with one or two 33-day programs. A good preventive measure is to undertake a 33-day **PurgeParasitis Program** once per year. If you regularly take trips out of the country or are planning a vacation, protect yourself by taking 1 capsule of **PurgeParasitis** and 1 capsule of **AcidophilusUltra** before each meal.

Purge Parasitis Contains:

Cloves

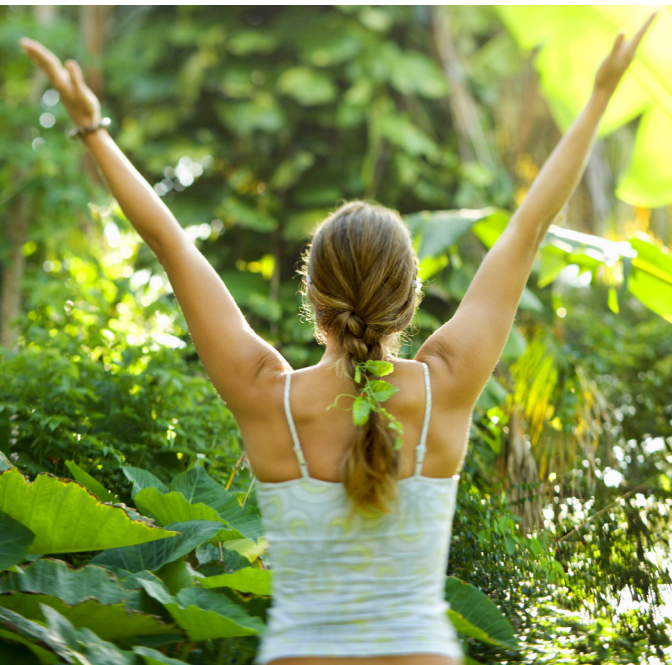

Cloves are used in traditional herbal medicine as a carminative for the relief of digestive complaints such as flatulence or abdominal distention.

Wormwood

Wormwood is used in traditional herbal medicine as a stimulant tonic to improve appetite and to relieve symptoms of dyspepsia (carminative) and is used in traditional herbal medicine to expel worms (vermifuge).

Black Walnut Hulls and Leaves

Black walnut is used in traditional herbal medicine as an anthelmintic for expelling ringworms.

PurgeParasitis Program

During the entire program, it is also necessary for you to take **FiberUltra Rich Plantago** or **Psyllium** and **AcidophilusUltra** (sold separately).

Fiber Ultra Rich Plantago or Psyllium

This powder should be taken once or twice daily. This formula provides high-fibre bulk (from a special psyllium compound, along with hibiscus, licorice, and cloves) for cleansing and moving the dead and half-dead parasites and their toxic waste products through your bowels quickly for elimination.

Acidophilus Ultra

AcidophilusUltra cleans the intestines and replenishes the gastrointestinal tract with 11 beneficial probiotics.
